

OPTICAL NODES · ONB-T

Discontinuation of the ONB-T Product Line

Termination of the variable-wavelength product line without replacement

DOCUMENT NO.

PCN-2026-002

DATE OF ISSUE

01.08.2026

AFFECTED PRODUCTS

ONB-T

LAST TIME BUY

Not offered

Dear Sir or Madam,

we would like to inform you of the following change to the products listed above:

● TYPE OF PRODUCT CHANGE

Due to developments in the global semiconductor market, several essential components of the **variable-wavelength ONB** can no longer be procured with reasonable effort. The product line will be **discontinued without replacement**.

● IMPACT ON CUSTOMERS

Customers using active optical DOCSIS return path receivers behind a splitter – i.e. multiple signals on a single photodiode – should carefully verify the wavelengths of the upstream lasers when replacing these devices. If a sufficient number of different laser diodes is not available, the use of a multi-diode receiver, such as our **OHR / O-MISO series**, should be planned.

The product line is discontinued with **immediate effect**. A Last Time Buy cannot be offered.

● CONTACT

Please contact your responsible sales representative or – if not known – **info@dct-delta.de**.

Kind regards

DCT DELTA AG
